Price Five Cents

TOWN TOPICS

The American public wants the highest possible standards of service from retail business. Some figures recently released by Chain Store Age, certainly indicate that it is getting it.

In the seven-year period 1947-1953, a grand total of more than \$5,000,000,000 was spent on building, remodeling and modernizing chain stores alone. About three-fifths of this, was spent by the chains themselves, and the balance by property owners from whom they rent. Other kinds of stores also spent huge sums for betterment.

The result is seen in every community, in more attractive displays, in ever-improving sanitation and service, in easier and more comfortable shopping for the public, in better working conditions for employees, and in multitude of other ways.

There is one extremely significant paragraph in the President's budget message to Congress. He said, "This budget marks the beginning of a movement to shift to state and local governments and to private enterprise, federal activities which can be more appropriately and more efficiently carried on in that way."

The philosophy underlying that statement is infinitely more important than the praiseworthy cuts in federal spending the budget contemplates. For only by turning our backs squarely on the super-state idea, and by confining the federal government to the constitutional functions which only it can undertake, can we preserve either our liberties or our solvency as a nation.

Every American was horrified at the ghastly toll of the Korean war.

Yet last year alone, accidental deaths accounted for three times as many victims as that war. Some 95,000 people died unnecessarily, traffic accidents being the Number 1 killer, with 38,000, and 9,600,000 were injured. The economic cost to the nation is estimated at more than \$9,000,000,000.

The president of the National Safety Council made a memorable commentary; "We do not believe that any civilized nation in long endure this tragic and disgraceful waste of manpower and resources, from accidents"

Marked Improvement Of Garbage Dump Appearance Promised

Fence Around Area To Be Erected Soon

That a marked improvement in the appearance of the municipal garbage dump, which the club described as an unsightly location, and a bad advertisement for visitors approaching the city, will be seen within a short time, was predicted by the committee named to take the matter up with the City Council, when the Rotary Club met at Georgetown's, Tuesday noon.

It was reported that Councilman O'Leary, who has handled the matter of "Matters of the Air" spot, during the mission during a will be a success. The expedient highway running through the dump. However, since the will not attain full growth for two or three years, a fence will be erected with a short time, which will run for 500 feet between the road and the dump to screen it from public view. The fence will be six feet high, with the stakes placed in alternate rows. It was also announced that through O'Leary's efforts, the remainder of the street signs which the club advo-

COUNCIL MEETING DATE CHANGED

The date for the next public meeting of the City Council has been changed from Wednesday night, March 17th to Tuesday night, March 16.

Since the regular Wednesday night date will be St. Patrick's Day, and officials and spectators alike will be concerned with celebration plans, the date change was made. Future meetings will take place on the first and third Wednesdays of each month, as previously.

Hilda's Guild Meet Tuesday At Hillmann Home

Other Events Also Planned By Christ Church Women

Tuesday afternoon, St. Hilda's Altar Guild of the Women's Auxiliary of Christ Church will meet at the home of the Directress, Miss Sophie Hillmann Wednesday, morning at 10, the members of St. Helena's Missionary Guild will participate in a corporate communion.

Rev. W. H. Blackley Resigns As Pastor Of First Baptist

Will Take New Post At Newark Church

The Reverend William H. Blackley has submitted his resignation as pastor of the First Baptist Church here, to become effective on April 3.

Rev. Blackley, who became the pastor of the local church in 1950 will take over the pastorate of the Mount Pleasant Baptist Church at Newark.

A special business meeting of the congregation has been announced for next Sunday morning, to plan for the engaging of a successor to the Reverend Blackley.

YOU ARE IN THE YET, for a heating job done in your home, either hot water, steam, hot air, pipe or pipeless, or an air conditioning job. We carry the material in stock for a good and quick job—at it since 1883, Monaghan, Stevens Avenue and David Street.

Deadline For Filing Of Primary Petitions Will Be Reached At Midnight

At midnight, the deadline for the filing of petitions for the forthcoming primary election will be reached.

Although there is more than the usual interest in the election because of two factors, not ordinarily injected into an election, the selection of a City Clerk, and a referendum on the legalization of "bingo", in the state, and these factors are certain to contribute to a larger than ordinary vote, both parties locally have had considerable difficulty in deciding on a ticket that might be looked upon as one with organization approval, and the number of candidates for the City Clerkship is much smaller than was anticipated. The offices to be filled at the

general election are Mayor, Councilmen in the Second and Third Wards and City Clerk.

On the Democratic side, Council President William O'Leary will be a candidate for Mayor.

Leon Wisniewski will be a candidate for reelection as Councilman at Large and James VanDerveer will be a candidate for reelection as Second Ward Councilman. John Howley will file petitions for the Third Ward Councilman post, and there is a possibility that there will be two candidates for City Clerk, John Triggs and Chester Meisner.

Mayor Olsen will file as a Republican candidate for Mayor. Kenneth Sharo for Councilman at Large, Lester Batchelor as candidate for Councilman in the Second Ward and George Stader as candidate for Third Ward Councilman.

The Republicans too, are expected to have two candidates in the field for City Clerk, Donald W. Reed and Joseph Charnello, at present Councilman from the Fourth Ward.

It has been rumored that there may be several candidates from the Democratic party who will run more or less as independents. Former Mayor Joseph McKeon for reelection to that office and William Richmond, candidate for Councilman at Large. It is said that petitions for both these men have been circulated, and will be filed at City Hall before midnight. It is also expected that James Powers will file as an independent candidate for City Clerk.

New Minister Is Selected By City Presbyterians

David Muzakens At Present Student At Princeton

Recently, the members of the First Presbyterian Church here selected a new pastor.

David Muzakens, at present a student at the Princeton Theological Seminary has been called to the local pulpit, and will devote his full time to the parish after he graduates in June.

In the meantime, he will preach every Sunday at the church.

VETERANS ADMINISTRATION Information Service

Q—I started training as an accountant under the Korean GI Bill, but I'm afraid I'm in the wrong field. I know I'll have to make my one-and-only change of course, but I want to be reasonably sure it'll be the right change. Could I get VA vocational counseling to help me?

A—Yes. You may apply for counseling on the same application form you use for requesting a change of course.

Q—I want to go to college under the Korean GI Bill to take courses in a variety of fields. They wouldn't lead to a degree or to any sort of objective; they're just courses I've always wanted to study. Would I be permitted to do this under the GI program?

A—No. Under the law, your training program must lead to a single, identifiable educational, professional or vocational objective. You would not be permitted to take courses that do not lead to such an objective.

Q—My wife and I both are World War II veterans. May we buy a business together, with a GI business loan, and thereby increase the amount which may be guaranteed? It would not be a real estate loan.

A—Yes. However, the guarantee may not exceed 50 percent of the loan, up to \$4,000, which is the maximum for your combined business loan guarantees.

Q—May a seller charge me more for a house than it has been appraised for by the VA? I buy it with a GI loan?

A—No. Under the law, the purchase price may not exceed the reasonable value determined by VA appraisal. It is illegal to pay more.

RADIO'S WHO'S WHO

As one of today's leading Shavian disciples, Sir Cedric Hardwicke is rarely thought of as a song and dance man. But in the early twenties, following a role in Shaw's "Heartbreak House," Sir Cedric achieved prominence in comic opera and barely escaped being typed as a comedian. His "liberation" from that fate came, however, when he scored a hit in another GBS work, "The Apple Cart." And he's been at serious drama ever since.

Now as Mutual's "Bulldog Drummond," the versatile Sir Cedric finds it natural to portray the role of his native England's celebrated fictional detective. Since his early days he has starred in a variety of productions that might stagger a lesser actor. These successes led to his being knighted in 1933.

World War II interrupted his career when he went overseas for the British equivalent of the USO. His greatest triumphs followed. Recent appearances with Charles Boyer, Charles Laughton and Agnes Moorehead has fixed his name fast on the list of theater immortals.

Ductile Iron Established

Although it has been in commercial production for only a few years, Ductile Iron has already entered nearly every field of engineering practice. This new material, introduced several years ago by International Nickel, is now produced by over two hundred and fifty licensed foundries in twenty-two countries throughout the free world. The range of castings of Ductile Iron extends from small electrical fittings to rolls and hammer blocks weighing 50 tons.

Alloying Metal

Nickel is alloyed with steel, cast iron and many other metals to provide increased resistance to corrosion and heat.

Orchids - Before And After

NEW BRUNSWICK—Rare is the woman who would turn up her nose at an orchid, but how girls acquire one after the prom or wedding?

Today, the answer is surprisingly large according to Dr. O. Wesley Davidson, director of orchid research at Rutgers University's College of Agriculture, who claims orchids are fast becoming accessible to any woman who wants them.

Dr. Davidson feels New Jersey's nation-leading orchid growers, who last year marketed their crop around the world for some \$3,500,000 or roughly one-third of the dollar sales rung up by all American orchid growers, will continue to increase their orchid production. In fact, he sees the day when orchid plants will be common home ornaments and flowers for a date will as often as not be orchids.

What is placing these onetime showpieces of the very wealthy within reach of just about everyone's budget?

Competition and science, says Dr. Davidson. He explained that Jersey orchidmen have been feeling the pinch of competition more and more in recent years. Other orchid range areas, notably those in California, have contrived to cut down the dollar sales value of New Jersey orchids from a pre-war peak of about 50 per cent to somewhere around 33 per cent of the national business.

Dr. Davidson and his staff provide the science in the form of a research project which ranks as the largest university-run orchid study in the nation.

A professor of ornamental horticulture at the College of Agriculture where he heads up

research on roses, carnations, geraniums, gladioli and many other flowers, Dr. Davidson has directed the Rutgers orchid research program since 1945 when New Jersey growers asked him to establish it.

They wanted his help in developing growing methods that would produce more and better specimens.

The New Jersey Orchid Club now help sponsor the project.

Out of that initial meeting came a 1945 study of orchid nutrition and proof that fertilization is essential to good orchid growth. Dr. Davidson said that there was doubt at that time whether fertilizer was even necessary. Many growers considered the air a sufficient supplier of nutrition. He said that idea came from England where orchid growers and collectors first flourished in the last century.

It was also determined that osmunda peat, the conventional orchid potting medium, furnished inadequate amounts of nutrients for the many rapid-growing varieties. Rutgers scientists developed a liquid fertilizer that does the job.

Other Rutgers developments calculated to increase the New Jersey orchid crop are a shading cloth, designed in cooperation with Johnson and Johnson of this city, and relatively cheap, high-pressure sprays for humidifying and cooling greenhouses.

Dr. Davidson said one of the biggest problems facing Rutgers orchid researchers is atmospheric pollution that causes abnormal flower development. He

said experiments in this field indicate an early solution to the problem.

By way of describing the complexity of his project, Dr. Davidson said there are hundreds of varieties of orchids and that the Rutgers collection, now only eight years old, has burgeoned into the greenhouses and rates as the largest university collection in the country. And economy-wise, the orchid crop has moved into third place in the state in dollar sales among plants and flowers, out-ranked only by roses and potted plants.

The roster of "customers" for the Rutgers project includes the biggest and one of the oldest orchid firms in the nation.

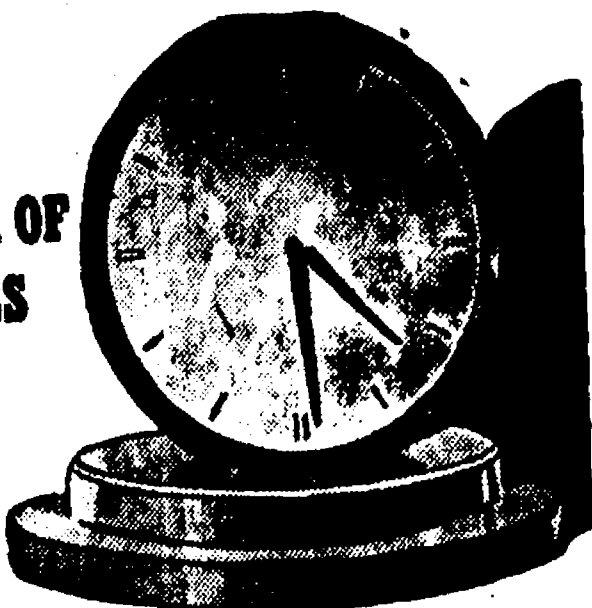

John B. Lager, son of John E. Lager, who established one of the first firms in America, is still doing business at the same old "stand" in Summit. It is believed that a Summit neighbor of the late Mr. Lager founded the first orchid business just before the turn of the century.

The Thmas Young Orchards in nearby Bound Brook, founded in 1907 as Thomas Young Nurseries, is the biggest orchid range in the world. The late Mr. Young started in business with roses, then added gardenias and finally orchids. Then he abandoned his roses and gardenias to concentrate on the orchids.

Just what is the future of the orchid business? Well some prominent Jersey growers have even experimented with orchid sales in supermarkets and five and ten cent stores. Obviously orchids no longer belong to the limousine class!

NEW YORK VIGNETTES • • by H. J. Algas

SHOW TIME: New York City is enjoying one of its most active theatrical seasons with more than thirty productions vying for the public's favor.

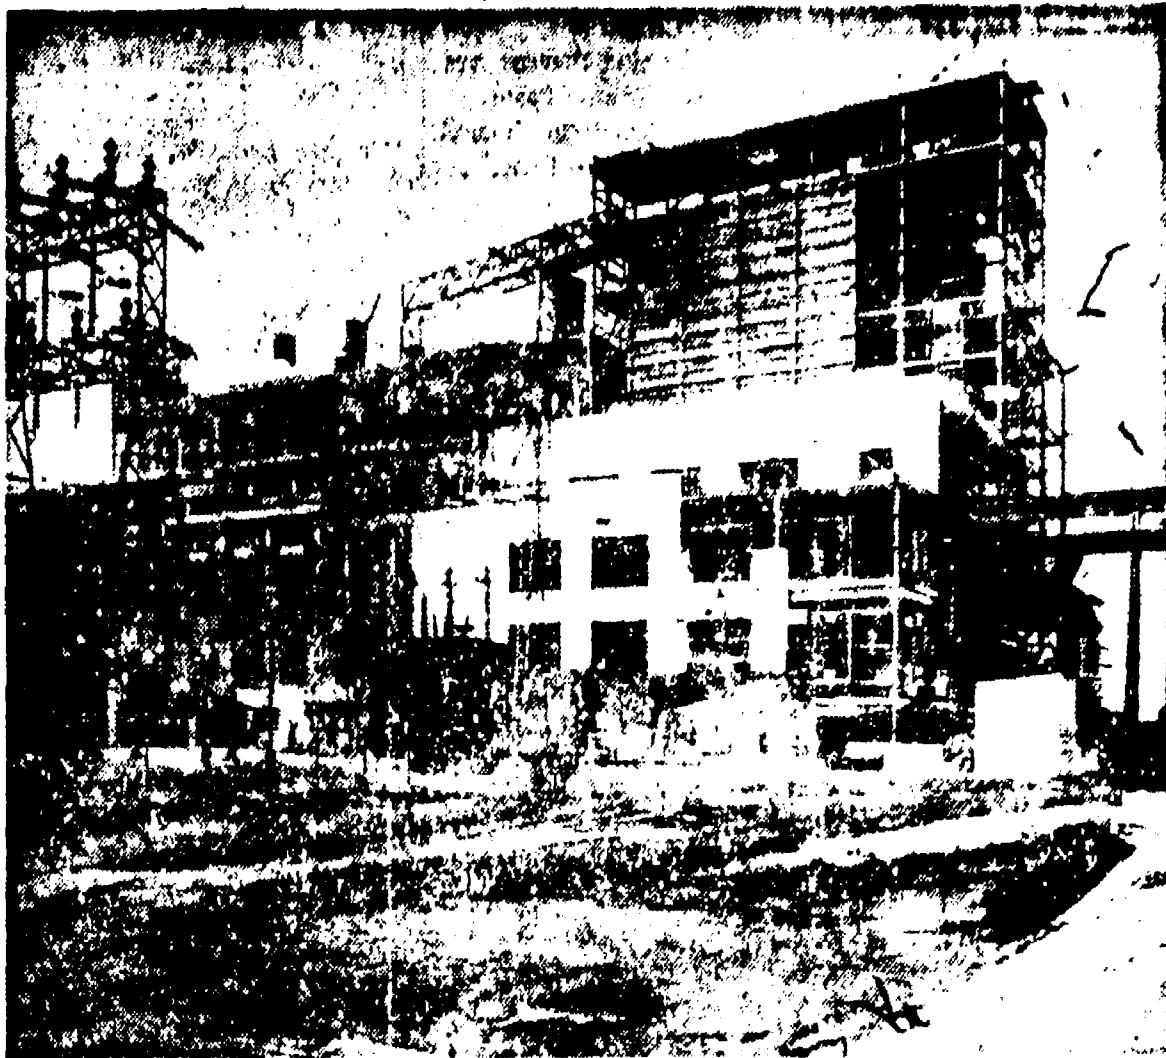

With some of the more popular shows sold out months in advance, Mutual's Johnny Olsen advises those planning Gotham vacations to write for reservations. Two of the best shows on the Great White Way are "The Caine Mutiny Court-Martial" and "Teahouse Of The August Moon" with tickets almost impossible to get. Some of the better plays recommended by the star of the "Johnny Olsen Show" are: "Can Can"—Cole Porter music in a Parisian setting; Victor Borge's "Comedy In Music"; "The King And I" with Yul Brynner, Annamary Dickey and Rogers and Hammerstein music; the sprightly Arabian musical "Kismet"; "Oh Men, Oh Women" with Franchot Tone and Betsy von Furstenberg; "Sabrina Fair" with Margaret Sullivan and Joseph Cotton; "The Seven Year Itch"; "The Solid Gold Cadillac" with Josephine Hull; "Tea And Sympathy" in which Deborah Kerr makes her Broadway debut; and "Wonderful Town" with Rosalind Russell. Tickets can usually be obtained at the box office for the following shows: "His And Hers"; "Fifth Season"; "In The Summer House"; John Murray Anderson's "Almanac"; "Kind Sir"; Mademoiselle Colombe; "Me And Juliet"; "Dial M For Murder".

ODDS AND ENDS: Criminals bent on stealing automobiles in New York City seldom figure the odds against a safe get-away. A stolen car trying to escape has the advantage of more than 4,000 miles of streets to hide. However, it must elude 300 radio patrol cars which receive immediate warnings. If the position of the fugitive is known,

every street in a given area is surrounded. Should the car get out of the city, highways are blocked. Warnings are relayed immediately to neighboring states. With all this activity, few felons make successful raids. One of the busiest business districts in New York is in downtown Manhattan along the Bowery, the city's Skid Row area. Upwards of 500 merchants do a \$100-million a year business with people from all walks of life. So closely are they guarded, that there hasn't been a holdup in more than 50 years.

SUCCESS STORY: Years ago he was just another raggedy youngster playing in the streets of Manhattan's tenement district. Today he is the leader of a five-year expedition to the South Pacific to study the life cycles and taxonomy of big game fish. His name is Lou Marron, a wealthy business man and an internationally

known sportsman and big game fisherman. Ray Nelson, producer-panelist of Mutual's "Red And Blue Club Of The Air" spotlighted Marron's mission during a recent MBS broadcast. The expedition, under the auspices of the Marine Laboratory of the University of Miami, will use a specially designed 40-foot boat, the "Explorer," for its trip around South America. The "Explorer" is equipped with aquarium tanks for hatching freshly-caught fish eggs and nurturing larvae; refrigerating equipment for preserving full grown specimens; a fiber glass coating on its hull to prevent attack by marine borers; and a completely new type of marine telephone powerful enough to keep in touch with home ports along the South American coast and to maintain contact with the North American mainland.

ADDITION TAKES SHAPE—Construction of another power plant addition by Jersey Central Power & Light Company takes shape at the Raritan River generating station at Sayreville where \$25 million expansion project is under way. The new addition will add 137,000 kilowatt generating capacity to the company's power supply. This addition, scheduled for completion early in 1955, is the third such project of its type undertaken by JCP&L since the end of World War 2 at a cost of more than \$42 million. When completed, the Raritan River project will help to more than double the company's generating capacity since its post-war expansion program began. Last year JCP&L completed a \$12 million, 62,500 kilowatt addition to its E. H. Warner station at South Amboy.

D.C. COMMENTATOR

Robert F. Hurler, one of the country's top radio commentators, is now heard over the Mutual Broadcasting System's capital city station, WDCB, 1500 K Street, N.W., Washington, D.C.

Resist Heat And Corrosion
Cast alloys of chromium, nickel and iron retain mechanical strength at high temperatures, and also resist corrosion from various types of hot gases.

Platinum Metals Production

The world's annual production of the six precious metals is estimated at only about 20 tons. More than half of this output is platinum itself, with the remainder mostly palladium. The four other metals—rhodium, iridium, ruthenium and osmium—are very rare.

Ruthenium

Ruthenium, first isolated a little over a century ago, was the last of the six precious metals in the platinum group to be discovered. The other five of this group are platinum, palladium, rhodium, iridium and osmium. All but osmium are used in jewelry.

Hostesses will be: Mrs. Pearl
Potts, Mrs. Helen Quislin, Mrs.
Helen Oliver, Mrs. Mary Salmon,
Mrs. Florence Spina, Mrs. Beat-
rice Tarallo, Mrs. Genevieve
O'Connor and Miss Catherine
Gereghy.

LOCAL MAN ON
DEAN'S LIST AT
RUTGERS U.

NEW BRUNSWICK—The se-
lection of 48 Rutgers University
seniors for the Dean's List of the
College of Arts and Sciences
here was announced today by
Dean Harry G. Owen.

The Dean's List includes the
names of those students in the
class of 1954 whose work during
1952-53 was generally outstand-
ing, and who maintained a high
scholastic standard during the
first semester of the 1953-54
academic year.

Forty-eight per cent of the
seniors on the Dean's List hold
scholarships at the State Uni-
versity. Four of the students are
from New York State. The re-
mainder represent thirteen coun-
ties in New Jersey.

Among the group is John E.
Latourette, 152 Second Street,
this city, majoring in economics.

VANDALISM IS
REPORTED BY
CONTRACTOR

Walls Wagner of 7 Ocean
Avenue, Keanburg, contractor
in charge of the remodeling of
the residence of Dr. Janop at
246 Main Street, reported to
police on Monday, that vandals
had entered the house, and
smeared the tile bathroom floor
and the cellar door with paint
being used in the remodeling.
He reported they also 'took
brushes left in the house.

American Families

There are 100 million cards rep-
resenting American families in the
Washington offices of the Bureau
of the Census.

IN APPRECIATION

We wish to extend our thanks
to our friends and neighbors
who offered assistance and ex-
pressions of sympathy during
the recent bereavement of our
wife and mother, Mrs. Betsy
Forgotson.

Our special appreciation is
extended to the South Amboy
First Aid and Safety Squad, Dr.
J. F. Weber, and the members
of the Police Department.

The Forgetson family

PERSONALS

Thomas Schuyler, son of Mr.
and Mrs. B. P. Schuyler, of 501
Bordentown Avenue, was re-
cently pledged by Delta Upsilon
Fraternity at Marietta College,
Marietta, Ohio.

Mr. and Mrs. John Margaret-
ta of Henry Street, are the par-
ents of a girl, born Friday at the
South Amboy Memorial Hospi-
tal.

This evening, there will be a
meeting of the Women's Mis-
sion Circle of the First Baptist
Church, at the home of Mrs.
Lella Neill, 234 Second Street,
when the leader will be Mrs.
Agnes Hamilton, and devotions
will be led by Mrs. Bertha Hines.

Tuesday evening, a special
meeting of the Board of Educa-
tion will be held in the office
of the Superintendent of Schools.

Mr. and Mrs. Robert Ohmer
of Lake Street, Morgan, are the
parents of a daughter born re-
cently at the hospital here.

Among recent births at the
South Amboy Memorial Hospi-
tal were a son to Mr. and Mrs.
Peter Mancini of Victory Plaza,
daughter to Mr. and Mrs. Nor-
man Magill of Dodd Place, Mor-
gan; daughter to Mr. and Mrs.
Edward Polguy, of 748 Hilltop
Avenue, Laurence Harbor, and a
daughter to Mr. and Mrs. John
Corvino, of 117 North Broadway,
this city.

Mr. and Mrs. Vernon Tice, of
224 Church Street, are the par-
ents of a daughter born recently
at the Perth Amboy General
Hospital.

An egg decorating contest will
be held by St. Catherine La-
boure Troop of the Junior Cath-

olic Daughters of America, on
March 29th at the home of Miss
Marie Pierson on South Pine
Avenue.

Wednesday evening, a meet-
ing of the City Council will take
place at City Hall.

Tonight, Luke A. Lovely Post
of the American Legion will hold
its weekly meeting at the post
home.

Joel Parker Council, No. 69,
will hold a meeting tomorrow
night at Christ Church parish
house.

At baptismal services held re-
cently, the infant son of Mr. and
Mrs. Raymond Nebus, of Cedar
Street, was christened Raymond
by the Rev. Bielan at the Sacred
Heart R. C. Church here. Spon-
sors were, Miss Margaret and
Kenneth Szaro.

Judge Klemmer Keltelsen was
the speaker at the meeting of the
Men's Club of Christ Church
held Wednesday night at the
parish house.

Tuesday night, a special meet-
ing of the Board of Education
will be held in the office of the
Superintendent of Schools.

Monday night, a meeting of
the Junior Woman's Club was
held at the YMCA, when the
program was under the direction
of Mrs. Harry Weck.

Tuesday night at 11:20, fire-
men were called out, when a
false alarm was rung in from
Box 71 at the Corner of High-
land Street and Hillcrest Avenue.

Plans to attend the Passion
play "Veronica's Veil" at Union
City, were made at a Monday
night meeting of the Rosary
Society of St. Mary's R. C.
Church.

Funeral Rites Were
Held Sunday For
Mrs Betsy Forgetson

Mrs. Betsy Forgetson, of 552
Main Street, died Saturday at
the South Amboy Memorial
Hospital. Funeral services took
place Sunday at the Gundrum
Funeral Home, when Rabbi
Samuel Levy of Temple Shaarey
Tefilloh of Perth Amboy offici-
ated, assisted by Cantor N. L.
Chasin. Interment was in the
Beth Israel Cemetery at Easton.

Mrs. Forgetson was a member
of the United Brothers Beth Is-
rael Mordcaai Congregation, in
this city.

Surviving are her husband
Harry; four daughters, Mrs. Dora
Vogel, of this city, Mrs. Kathryn
Cohan, of Philadelphia, Mrs.
Florence Adams of Rumson and
Mrs. Rose Cieselski of Sayreville;
six sons, Reubin of this city,
Abraham, of Sayreville, Moses of
Chicago, Charles of Florida, Wil-
liam of Brooklyn and Samuel of
Milltown.

MEETING OF W. S. C. S.
TO BE HELD ON
TUESDAY AFTERNOON

Tuesday afternoon, the Wo-
man's Society for Christian Ser-
vice of the First Methodist
Church, will meet at the home
of Mrs. Charles Thomas on Pine
Avenue, at 2 o'clock.

The meeting hostesses will be
Mrs. John Gallagher, Mrs. Mundy
and Mrs. Semoneit.

Too Many Presbyopes

There are now in the United
States an estimated 20 million 45-
to-64-year-old presbyopes, or peo-
ple whose eyes have lost their
ability to focus for objects close at
hand.

Looking properly pensive, glamorous Hollywood movie star Denise
Darcel tries to make up her mind before appearing on a recent broad-
cast of CBS Radio's "Make Up Your Mind," program with Jack
Sterling as master of ceremonies. Celebrities like Miss Darcel, the
French actress, help solve amusing make-believe problems in human
relations on the program, which is heard Mondays through Fridays
at 11:30 a.m. EST over CBS Radio Network.

Bill Mrs Dora Vogel

IN SERVICE

Donald E. Lake, son of Mr. and Mrs. E. E. Lake, 441 Fortia st., South Amboy, N. J. recently took part in Operation Red Wing a training exercise of the 7th Division in Korea.

Army helicopters transported his fully equipped unit, the 17th Infantry Regiment's 1st Battalion, cross country to land them in a simulated combat situation.

Corporal Lake, an assistant squad leader in Company C, entered the Army in August 1952 and arrived in Korea last May from Indiantown Gap, Pa., where he completed basic training.

The Armed Forces are urgently in need of auditors to do important Government work. Vacancies exist in New York City, Rochester, N. Y., Utica, N. Y., Poughkeepsie, N. Y., Johnson City, N. Y., Buffalo, N. Y., Port Newark, N. J., Bridgeport, Conn., Boston, Mass. Salaries range from \$5,080. to \$8,360. per year depending upon the qualifications of persons hired.

A minimum of five (5) years accounting or auditing experience is required for these positions, however a college degree in accounting may be substituted for three (3) years of required experience. To qualify, experience in public accounting or industrial cost accounting or auditing is essential. Similar experience in Government is also accepted.

Persons interested in these important Civil Service positions should immediately contact the Board of U. S. Civil Service Examiners, Armed Forces Audit Agencies, 180 Varick St., New York 14, N. Y. or Director, 2nd U. S. Civil Service Region, New York 14, N. Y. for further information.

New Iron Ore Producer

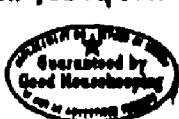

International Nickel has undertaken the construction of a \$18,000,000 plant for the production of by-product iron ore from nickel ores in the Sudbury District of Ontario. From the ores in this famous District, the company is presently producing twelve elements—nickel, copper, platinum, palladium, rhodium, ruthenium, iridium, gold silver, cobalt, selenium and tellurium. The new operation will ultimately yield annually about 1,000,000 tons of iron ore higher in grade than any now produced in quantity in North America.

Door to Knowledge

Invention of movable type by Johann Gutenberg in 1450 marked the transition from the Middle Ages to the modern age. Printing led to the spread of knowledge. From the old screw-type of press we have more recently come, through American inventions of typesetting machines and stereotyping processes, to giant newspaper presses that print with lightning speed in black and all colors of the rainbow. But the centuries-old type cases still have their place in every modern printing shop.

Graduated Salary Schedule Plan Not Favored By N.J.T.A.

Describe It As Sacrifice Of Home Rule And Greater State Control

TRENTON—The New Jersey Taxpayers' Association today urged defeat of a bill in the State Legislature fixing graduated minimum salary schedules for teachers, because it would mean sacrifice of home rule and greater State control over the public schools.

The measure, Assembly Bill 9, calls for a uniform, graduated salary scale with automatic annual increases for public school teachers throughout the State, establishing salary minimums ranging from \$3,000 to \$5,400.

According to the latest estimates of the National Education Association, average teachers salaries in New Jersey—now locally fixed—are among the highest in the nation. In addition the State contributes to the teachers pension fund each year an average of \$450 per teacher. In total school operating cost per pupil, in which salaries are the principal element, New Jersey is second only to New York. "Teachers should be adequately paid," pointed out the Association. "This is imperative in the interest of teacher, pupil and the public at large. To see that they are adequately paid is a primary duty of local boards of education."

"But the crux of Assembly Bill 9 is not how much teachers should be paid. It is whether the State should preserve for its local institutions their time-honored right of self determination."

"Shall the people of New Jersey sacrifice further their powers of home rule in return for more State control," asked the Association in an "It's Your Business" bulletin published today.

Palladium's 150th Anniversary

The year 1953 was the 150th anniversary of the discovery of the precious metal palladium by the noted British scientist, Dr. William Hyde Wollaston. Two impressive exhibits commemorated this event, one in London, England, in October, which was opened by H.R.H. The Duke of Edinburgh; the other is presently at The Franklin Institute, Philadelphia, Pa.

Pine Tree Shilling

The "pine tree shilling," first New England coin, was designed by Joseph Jenks who in 1644 molded the first iron made in America.

Still Plenty Of Winter Driving Ahead

Dangers Of Unpreparedness Are Pointed Out

Motorists, lulled into unpreparedness by an unusually mild spell of weather, may run into unexpected trouble because of overnight frigid spells and icy roads, unless they remember that there's still plenty of Winter driving ahead.

Winter's return to normal can result in many frozen car-cooling systems because of evaporation of anti-freeze during the mild periods, Keystone Automobile Club declares, advising all motorists to have car radiators checked immediately to avoid damage in case of sudden freeze.

Ice-glazed roads and streets also still can cause considerable grief to drivers in accidents caused by skidding, says Donald Sheldon, Manager of the Trenton Division of the Club, in a statement citing contributing causes.

"A formula to insure against skidding is impossible," the statement says, "but it is possible to inform drivers of the causes of skidding so that they can be avoided. Condition of tires is most important. A good tread will hold the car on the road under conditions that would be disastrous to a car equipped with 'bald' tires. Although not guaranteed to prevent skidding, chains are a big help."

"Careless operation of cars will result in skids, with or without chains. Slow driving on ice-covered streets, gentle application of brakes, using engine in gear as a brake, and careful rounding of curves and corners is the best advice we can give motorists."

"In case of a skid, the driver should steer in the direction of the skid and step on the gas instead of the brake. Sudden use of brakes, frequently a cause of wheel lockage, will continue the skid. Driving power of the rear wheels is needed to bring the car out of the skid. Steering in the direction of the skid and coincident acceleration will straighten out the car. In any event, one never should steer in the direction opposite to the skidding motion, because that results in causing the car to describe a circle, with great risk of crashing into approaching traffic."

Increases

Coupled with the continued diversification of markets for nickel in recent years, there has been a substantial increase in the metal's production. This greater output has been less apparent because of the large requirements of the defense programs and stockpiling desires of countries of the free world. Since 1940, the year prior to the beginning of the Korean conflict, the nickel industry of the free world has increased its annual production from about 265,000,000 pounds to approximately 340,000,000 pounds, or over 25 per cent.

Long-Lasting Cast Iron

For sandhandling equipment, Ni-Hard, a hard, wear-resistant nickel-chromium white cast iron, lasts for years where unalloyed material wears through in a matter of weeks.

There will probably be another meeting of one of the "I told you so" political groups tonight in a Third Ward store back room.

Every year on the night before the petition filing deadline, this group of five, one of them a former Councillman, report at City Hall to find out who filed petitions, then go to the store back room and figure out the local political future. The members of this quintette are an ambitious lot too. They don't only predict the outcome of the primaries, but go on to predict the result of the general election to follow, even estimating the majorities of the winners.

Of course, they're generally way off, but that don't seem to make any difference, they go right on predicting.

It was revealed Tuesday night, when an alarm came in from box 71, at the corner of Hillcrest Avenue and Highland Street, that there are five former firemen who always want to know where a fire is but depend on one person to tell them.

The five live side by side, on one of the Fourth Ward Streets, but since they have reached middle age, and before long will step over the line, into the old man class, they don't want to get up and get dressed and go out, so they have agreed that one of their number will answer all night alarms for information purposes only, then come back and tell them the news. When the alarm goes in, five lights go on in five bedrooms and the four stay at home, sit there until the other ex-fireman comes back and calls each of them by telephone, to give them the location and seriousness of the fire.

Probably nowhere else in town, could you find five ex-firemen of about the same age living side by side. One of them is an ex-chief two of them are ex-foremen, and another is an ex-chief-driver.

And again about ex-firemen. There have been some remarks lately about the absence at fires of a well known ex-smokie, who was always sure to be on hand, formerly when there was a blaze. The reason he's not seen on: at night fires any more, is because about three months ago, he fell down stairs one night, in his rush to a fire, and his wife won't let him go out to any more of them at night.

As a joke some time back, a patron of one of the town's popular thirastatoriums, told two who work at a Parlin plant, and live in the same block in which their favorite thirastatorium is located, that people were finding considerable money at the garbage dump.

The pair went down one after-

noon and searched around, but found no money. However, they did find some odd things, with the result that now, about once a week, they inspect the dump and come home with all kinds of articles they seem to regard as valuable, although to the average person, they are not important or useful enough to even bend over to pick up.

Early Tuesday morning, when everything was quiet, around 1.30, a car passed through town and twice it emitted six backfire sounds, one right after the other.

A First Aider who had just come home, was sure that there was gunplay going on as he heard the two reports, and figured that there were six shots being fired from two different revolvers. He visioned two cops chasing a criminal, and rushed out to his car and was off in an instant. He spent about an hour patrolling the town and finding no dead or wounded around decided that what he thought were shots, were backfire reports.

Face Lifting

More than four million trees and shrubs were planted on 4,000 surface mined acres in Pennsylvania in 1951 by coal operators, while the Pennsylvania Department of Forests and Waters planted more than one million trees and shrubs on 600 affected acres.

Free Matches

In the 50 years since a match company started the custom of free book matches with tobacco purchases, the practice has grown to a point where today an average of more than a million books of matches are handed out to Americans every hour—nearly nine billion free books of matches per year.

Crooked Teeth

Many malocclusions or so-called crooked teeth can be prevented if proper care is given to the primary teeth.

Around the Studios

by Charlie Brooks

Peggy Wood is as adept at writing about food as she is at preparing it. The February issue of *The Gourmet Magazine* is a mouth-watering example. Last summer Miss Wood (who plays the 41's role in CBS-TV's "Mama" show), toured Norway. Between steamer trips through the fjords, she noted the highlights of Norwegian culinary art and later wrote an article entitled "The Groaning Bord!" to squelch forever the "orange juice and black coffee for breakfast" set. And what a "bord" Miss Wood has pictured for us! She enthusiastically extols the virtues of the Kaitbord and the vermbord (the "cold table" and the "hot table") and lists a tempting variety of easy-to-make recipes for the little woman to try. What are the virtues of Norwegian cookery, we ask? "You can see for yourself," writes Miss Wood. "You make your choice—the only limitation is the size of your plate." "Mmmm," said we. "Sounds good."

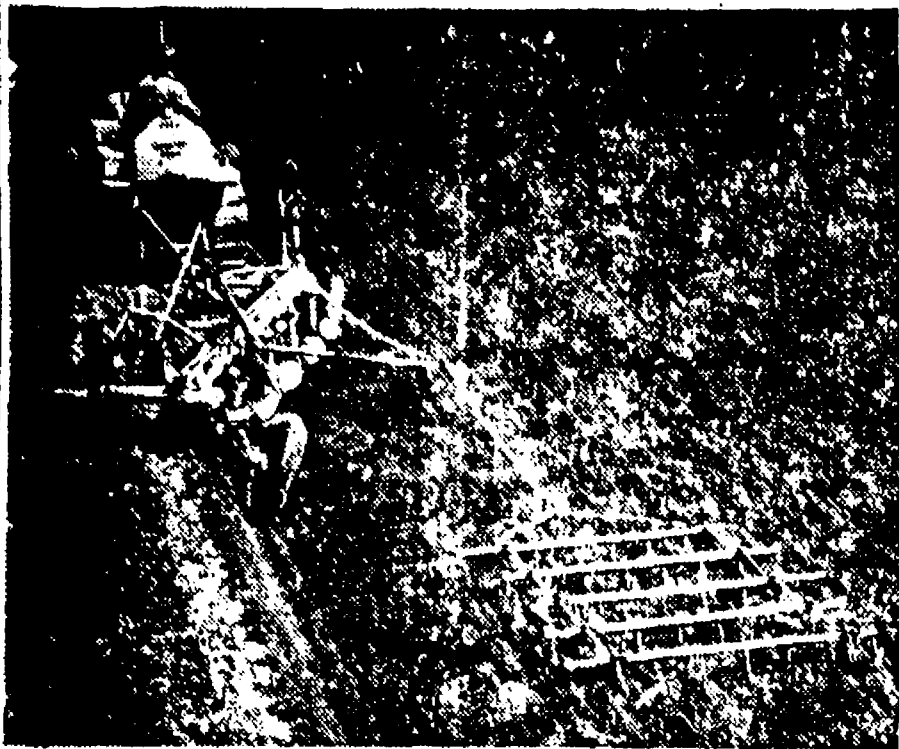

NBC-TV's "The Loretta Young Show" dramatization entitled "Nobody's Boy" has quite a story behind it. Way back in 1914 Jack Robbins began a city-within-a-city for seven boys about to be sentenced to reform school, calling it the Boys Brotherhood Republic. Since then, it has flourished under the management of its young citizens. When Loretta Young decided to do the story, Mr. Robbins was called in as technical adviser. When asked what inspired this unique rehabilitation program, Jack Robbins simply said, "There are no bad boys."

Wedding bells are ringing on the CBS-TV "Mama" show. Rosemary Rice, who plays the part of Katrin Hansen on the program, has announced her engagement to Lucian B. Taylor, Jr. of Montclair, New Jersey. But TV viewers like to think of it this way. Mr. and Mrs. Lars Hansen of 118 Steiner Street, San Francisco, have announced the engagement of their daughter, Katrin, to Lucian B. Taylor, Jr. of Montclair, New Jersey.

GROWING BETTER CROPS

Early Planning Helps Insure Profits

Preparing seedbed with disk plow, spike tooth harrow.

Making profits on cash crops in the face of today's peak farming costs calls for soundest planning, from planting right through harvest. In this the smaller farm is on at least equal footing with the big fellow: good management carries no price tag.

Now is the time to complete a good 1954 program, to get the paper work done, to take care of various essentials before the season is fully under way. This is particularly true of fruits and vegetables for processing, since farm and factory schedules should dovetail.

Yields, Quality at Stake

As Extension vegetable specialist James O. Dutt at Pennsylvania State University points out, "Recent developments have made it more necessary than ever before to use the soil, equipment and labor more efficiently in producing and handling vegetable crops for processing. Carefully planned operations aid in production of high quality, high yielding vegetables."

Crop authorities suggest that a checklist for growers now should include the following general activities:

Survey winter losses that may force changes which can still be made in methods, or in perennials. Inspect drainage systems. Plant windbreaks.

Secure all latest information from county agent and cannery fieldman, such as 1954 lime and fertilizer recommendations for specific crops.

Thermos Bottles

Thermos bottle dirty? Put in a tbsp. uncooked rice and 1 cup warm water. Shake well.

YOUR GARDEN

by CHARLES H. CONNOES

Many new home owners will be having gardens for the first time this year. There are those, also, who have had gardens and still have problems.

In many subdivisions, the general run of soil is poor and will require a year or perhaps several to build it into good condition for garden making. Grading generally was done with a bulldozer working whether the soil was wet or dry. This compacts the soil.

Poor soil from excavation or leveling was spread around. Perhaps an inch or two of topsoil of indeterminate value was spread over the subgrade soil. This is not enough to support good plants. They should have a foot or more depth of fertile, well drained soil to succeed.

Do not be too anxious to get at the job. If you dig when the soil is too wet you will make it even worse than it is. A good test is to dig up a spadeful or forkful and hit it a whack. If it breaks apart readily or if the clods do not appear to be held together by excess moisture, it will be all right to dig.

It is well to have soil tested for excessive acidity. This will be done for you by your county agricultural agent, or if you are

near a high school that has a course in vocational agriculture, students will test it for you.

Send a sample that represents the top foot of soil. Air dry the soil and send about a cupful. From this a determination will be made of the amount of lime to put the soil in proper reaction for plant growth.

Additional benefits come from the use of lime in proper amounts. It helps to improve drainage in clay soils and makes conditions more favorable for the growth of bacteria and such in the soil, and these help to make plant-food materials available to the plants.

The next step is to build up the fertility of the soil through the proper use of organic materials and fertilizers.

Ancient Past

The ancient world made extensive use of a mixture of gold and silver called electrum.

LADY OF SONG

Patti Page, lovely singer of popular melodies of the day, takes over the spotlight on Mutual's "Perry Como Show" when Perry takes a much needed vacation. Patti will hold forth on MBS from March 8 to 19.

ALONG RADIO ROW

Ungarnished truth can—and does—create spine-tingling adventure drama. Mutual's "True Detective Mysteries" is proof positive.

This feature now is in its tenth year as a key member of the MBS bloc of Sunday mystery favorites. And in all its many years on the air it's never presented one bit of fiction, one hypothetical case. Each adventure is based on an actual police file—with writer-director Murray Burnett adapting true facts to radio adventure format. The only camouflage he uses—fictional names for persons involved.

BURNETT

CRIME BUSTER

Portraying the role of urbane detective Mike Waring, George Petrie stars in Mutual's "Adventures Of The Falcon" dramatizations. George is shown "on the job" during a recent broadcast.

ASTHMA COUGHS

Don't let difficult breathing, coughing and wheezing due to recurring spasms of Bronchial Asthma or simple Bronchitis ruin your sleep and energy without trying MENDADO. Works through your blood to help loosen and remove thick, strangling mucus. Thus usually allays coughing and permits freer breathing and sounder sleep. Get MENDADO under money back guarantee of druggists.

THAT'S MY MOM!

Lovely Gale Storm, who plays the role of a twenty-one-year-old girl on mutual's "My Little Margie" program, fits the part to a "T". In real life, however, Gale is married and the mother of three lusty youths. Pictured are Mom and the boys—(l. to r.) Peter, 7, Paul, 6, and Phillip, 10.

NO MONTHLY CRAMPS... not even on the VERY FIRST DAY!

Doctors' tests show amazing preventive relief
of pain, backaches, nervous feelings

Women and girls who suffer from the functionally-caused cramps, backaches and headaches due to menstruation—who feel upset and irritable on certain "particular days" every month—may be suffering quite needlessly!

Such is the conclusion from tests by doctors in which Lydia E. Pinkham's Vegetable Compound stopped or gave amazing relief of such distress in 3 out of 4 of the cases... even on the very first and worst day of the period! Yes! Medical evidence proves Lydia Pinkham's mod-

ern in action. It exerts a remarkably calming effect on the uterus—without the use of pain-deadening drugs! The effectiveness of Lydia Pinkham's needs no proof to the millions of women and girls whom it has benefited. But how about you? Do you know what it may do for you?

Take Lydia Pinkham's! See if you don't get the same relief from cramps and weakness... feel better both before and during your period! Get either Lydia Pinkham's Compound, or new, improved Tablets, with added iron!

Lydia Pinkham's is wonderful for "hot flashes" and other functional distresses of the "change of life" too!

Lydia Pinkham's has a quieting effect on the uterine contractions (see chart) which may often cause menstrual pain!

THE TESTIMONY OF THE YEARS

In banking, particularly, age is an asset. When a financial institution has served a community as long and faithfully as this bank has, the testimony of the years provides conclusive proof of its soundness.

You will find in your associations here a richness of experience to draw upon which is certain to be of great benefit to you.

MEMBER FEDERAL DEPOSIT INSURANCE CORPORATION

Secretary Of State Patten Gets First Invitation

Perth Amboy, N. J. - The above photo shows John J. Wolczanski of Perth Amboy, N. J.; ex-Secretary of N. J. Senator B. W. Vogel and Founder of Central Jersey Pulaski Bowling and Softball Leagues presenting the first ticket to the 15th. Anniversary Dinner to Secretary of State of New Jersey, Edward J. Patten. The affair is scheduled for Saturday, April 24th. at the Perth Amboy Tennis Court auditorium, corner Sadowski Parkway and Brighton Avenue, Perth Amboy, N. J.

Left to right; John "Molly" Maliszewski of Perth Amboy, president of Bowling League; Louis Lagoda of Sayreville, director; Mr. Patten, Mr. Wolczanski and Joseph Lagoda of South Amboy, director. Missing from the photo are George J. Ottowski, public relations director; George Jacobs of Keyport, president of Softball League and Herman Ottowski of Perth Amboy, director.

The league has 22 active clubs, with athletes participating from New Brunswick, Perth Amboy, Carteret, South River, Sayreville, Woodbridge Township, South Amboy, Keyport, Matawan and Rahway.

The sale of tickets goes in effect on March 16th. with many sport celebrities, and many state and county officials invited to attend.

HEART ASSOCIATION PLANS ANNUAL SCIENTIFIC SESSION

The New Jersey Heart Association's fifth annual Scientific Session for physicians and surgeons will be held from 2 p. m. to 5:30 p. m. Wednesday, March 17, in the auditorium of Mutual Benefit Life Insurance Company, Newark, it was announced today by Dr. Louis F. Albright of Asbury Park, Association president.

Seven of the nation's top heart authorities will give papers at the Session, which is the annual high spot of the New Jersey Heart Association's program of professional education. Physicians and surgeons from all parts of New Jersey usually attend the Session.

Underground Airway

An underground airway which will ventilate workings almost a mile below the earth's surface is being driven through solid rock at the Creighton Mine of the International Nickel Company in the Sudbury District of Ontario. The airshaft, 13 feet in diameter, will furnish fresh air to the mine's lower levels at a rate of 350,000 cubic feet per minute.

Monel Aids Petroleum Industry

Monel, an alloy of nickel and copper, because of its high strength and resistance to corrosion, is an accepted material in oil well drilling equipment and as corrosion-resistant sheathing to protect off-shore drilling platforms.

Getting Up Nights

If worried by too frequent, burning or itching urination, Getting Up Nights, backache, Pressure over Bladder, or strong Cloudy Urine, due to minor Kidney and Bladder Irritation, ask your druggist about usual prompt, palliative relief from CYS-TEX, 100 million CYS-TEX tablets used in past 25 years prove safety and success. Don't waste time. Ask druggist for CYS-TEX under money-back guarantee.

NI-Resist Applications
NI-Resist, the corrosion-resistant nickel alloy cast iron, is used in components of industrial equipment where resistance to corrosion, heat and wear is required.

Tough And Abrasion-Resistant
Because of its toughness and resistance to corrosion, Ductile Iron is employed for agricultural plow shares, digger teeth, sand handling and similar equipment.

Mastery of the Rope Is An Art

"The Master Hand," 8 1/4" x 10 1/4" by W. R. Leigh
BY ROPING THE LEADER, THE MASTER HAND SELECTS THE BEST HORSE IN THE HERD

It is conceded by all who know our West that this colorful part of our country has been more realistically brought to our East by the dramatic work of The Master Painter, W. R. Leigh, than in any other way.

Within the last year this artist has received some much-overdue tribute to his patriotic contribution to the land of his birth. Besides being recently elected an Associate of the National Academy of Design, the Artists Fellowship at a dinner at the Salmagundi Club, on December 2, 1963, awarded him the Benjamin West Cincinnati Memorial Medal for outstanding achievement in fine arts.

On January 11, 1964, the Honorable Theodore R. McKeldin, Governor of Maryland, acting for the Maryland Institute, second oldest art school in America, presented Leigh with the Alumni Honor Medal as the Institute's most outstanding graduate. The Governor, in speaking of West Virginia, Leigh's native state, said, "We of Maryland are proud of this rugged neighbor of ours and of the great men and women its high mountains and deep valleys have given to the world, and there is none of whom we are more proud than our guest here tonight—Mr. William Robinson Leigh."

Leigh's one-man show in Hagerstown, Maryland, at the Washington County Museum of Fine Arts, extends from the last day of February through the month of March. The public is invited.

Leigh and his wife, Ethel Traphagen, founder of the Traphagen School of Fashion in New York, will attend the exhibit, at which time he will discuss many artistic opportunities which the beauties of America offer not only to its artists but to all that have the seeing eye.

His paintings can always be seen at the Grand Central Art Gallery, Vanderbilt Avenue at 48th Street, New York, N. Y.

Faulty Bikes Labeled A Problem In England

Large Number Sent To This Country Seen As Creating Danger

Cyclists in England face serious restrictions if the bike accident rates continue to grow, with powerful groups petitioning Parliament for new "Construction and Use" regulations. The latest British body to start such a campaign is the West London Road Safety Committee which expressed concern "at the danger to which pedal cyclists, particularly in the age group from 10 to 15, are exposed by riding on machines which are not roadworthy."

The committee claims that a high percentage of British wheels involved in accidents have "among other defects, completely ineffective brakes, defective bearings, loose handlebars and saddles, rendering the cycles unfit for use on the roads."

Chief concern of American safety experts today is that with the increase in use of imported bikes in this country there will be an increase in accidents paralleling the rise in England. Despite the fact that there are nearly twice the number of bicycles in the United States as in England—U. S. 22,000,000, G. B. 12,500,000 the bike accident record in the U. S. has been going down at a steady rate since 1941. According to the National Safety Council, serious bicycle accidents (those involved with motor cars which comprise 84% of the whole) have dropped 45.5 per cent in the last 11 years. Based on the last statistics released by the British Ministry of Transport in 1961 and U. S. statistics compiled for the same year, the British bike accident rate in all categories is 47 per cent higher than in this country.

It is generally agreed by safety experts that major credit for the great safety record of American cyclists should go to the American-built bike with its efficient coaster brake, low-pressure tires (22 pounds against 60 for imports) plus the most important fact that American bikes require much less care and adjustment to keep them in safe riding condition.

Local Knights Slated To Receive Third Degree

To Be Conferred At Perth Amboy On March 20

It has been announced by Grand Knight, William Fleming of local Council No. 426 of the Knights of Columbus, that exemplification of the Third Degree of the order will take place Saturday, March 20 at the home of San Salvador, Council, 228 High Street, Perth Amboy. All candidates from the local Council are to meet at the local headquarters on Fourth Street at 7 P.M., and transportation will be provided.

Fleming, with the Rev. Brian O'Reilly, the Chaplain of the local Council, have been selected to attend the testimonial dinner and reception honoring Thomas A. Barry State Deputy, to be at the Military Park Hotel in Newark, Sunday, April 26th.

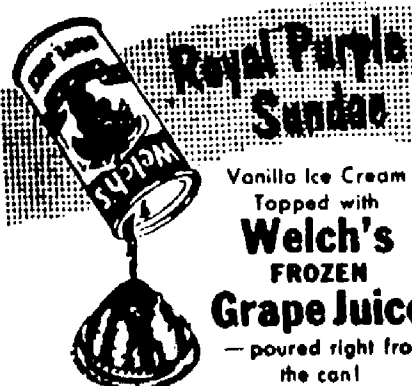

Among events in which the local Council will be represented is the 58th annual convention, to be staged at Atlantic City on May 14, 15 and 16, and the annual Charity Ball of State Chapter No. 4 to take place on April 30th, at the home of Carey Council at Carteret.

Andrew Frankowski, of the local Council's Catholic Activities Committee, has announced a mass for deceased members of the Council will be held at Sacred Heart R. C. Church on Sunday, March 28th, at 10 A. M. At a recent meeting, the Council voted a donation to the Middlesex County Heart Fund.

Component Parts

Exterior house paint is made of pigment, an oil binder and drier, plus a thinner to make the paint brushable.

THRILLING NEW DESSERT!

MAKES IT AT HOME TONIGHT!

George Washington Carver

It is not every artist whose paintings are valued at \$4,000. It is all the more unusual when both the paint and canvas are made by the artist himself. Yet, it was the famous European art gallery at Luxembourg and also the Chicago World's Fair which placed the price on these pictures painted by a man primarily known for his work as a research chemist—George Washington Carver. He made the paint from Alabama clays and the canvas from cottonseed fibers.

Tumble Finishing

One of the methods of applying industrial finishes is by tumbling. The pieces to be finished are put into a barrel, which is mounted to revolve on its axis. A small quantity of finishing material is poured over the pieces and the barrel revolves until all surfaces are evenly coated. Tumble finishing is particularly suited to finishing small wood, metal, and plastic articles, such as buttons, handles, knobs, children's building blocks, tops, golf tees, fishing lures and beads.

Mosquito Control Is Called Vital To State's Future

Dr. William H. Martin Gives Address At Opening Session Of Exterminators Convention

ATLANTIC CITY, N. J.—Mosquito control is more important in New Jersey today than ever before "due to urbanization, industrialization, intensification of agriculture and a coastal recreational industry valued at over one billion dollars."

This statement was made by Dr. William H. Martin, director of the N. J. Agricultural Experiment Station in a speech prepared for the opening session of the N. J. Mosquito Extermination Association at Hotel Had-don Hall Tuesday afternoon.

The New Jersey Association is meeting jointly with the American Mosquito Control Association which is holding its tenth annual meeting here.

Since their inception some 20 years ago, the county commissions have been the core of the mosquito program in New Jersey, Dr. Martin declared. Unfortunately, a few counties still do not have commissions, although public interest in organized mosquito control in those areas is increasing, he said, especially along the lower Delaware River and Bay.

Cooperation between freeholder boards and mosquito commissions was discussed by Albert S. Smith of Brigantine, Atlantic County freeholder and treasurer of the State Association of Freeholders.

"Nowhere in the realms of county government services is there such a bargain in terms of tax dollars expended as in county mosquito control," he declared. "The continuing war against insects challenges individual freeholders to study the problem and become better acquainted with the specific needs for equipment, personnel and educational campaigns to win the battle."

Pointing to the counties that do not have commissions Mr. Smith said, "I earnestly invite the freeholder boards of Cumberland, Salem, Gloucester, Camden, Hunterdon and Warren Counties to constitute mosquito extermination commissions under the law, to provide them with adequate public funds to perform their functions and to complete the control ring of all 21 counties at war against mosquitoes in New Jersey."

F. C. Blahopp of Brownsville, Texas, president of the American Mosquito Control Association, said that for 40 years the New Jersey Association has not only performed a great service to the people of the Garden State but has been a stimulating and stabilizing influence in mosquito work throughout the world.

Precious Contacts

Several thousand contacts are put to work every time a dial telephone is used. These contacts, tipped with palladium, one of the precious metals of the platinum group, are utilized in the automatic switching equipment connecting the telephone with the one dialed. In a large modern telephone office, two million palladium relay contacts open and close a billion times a day. By resisting spark erosion and oxidation, the palladium contacts assure quiet circuits and long dependable service.

Funeral Rites Were Held Saturday For Mrs. Margaret Kuc

A funeral was held on Saturday for Mrs. Margaret Kuc, of 344 Fourth Street, when the Rev. Walter Urbanik, pastor of Sacred Heart R. C. Church was the celebrant of the funeral mass, the Rev. Malvin Stan-czewski, the deacon and the Rev. Stephen Bielen the sub-deacon.

Interment was in Sacred Heart Cemetery, and the bearers were: Nicholas Skrynska, Raymond Lucchi, Thomas Adamczak, Charles and Anthony Carbone and Frank Morminello.

World's Largest Lake Trout

The largest lake trout ever recorded as taken on a rod and reel was caught on a Monel wire line. Setting a world's record, the whopper weighed 63 pounds and 2 ounces.

EASTER LILY IS FEATURED ON EASTER SEAL

The 1964 Easter Seal, designed for the annual appeal of the New Jersey Society for Crippled Children and Adults and its affiliated groups throughout the state and nation, features a stylized Easter Lily in intense blue and yellow. It was announced today by Earl S. Miers of Stelton, president of New Jersey Society, better known as the Easter Seal Society.

Miers said the seal, in sheets of 100, will go into thousands of New Jersey homes as the major means for raising funds for care, treatment and rehabilitation of crippled children and adults. At least 1,200,000 sheets of seal will be circulated in this state.

Vital Metal

It is estimated that almost half of the free world's production of nickel during 1963 was line. Setting a world's record, the whopper weighed 63 pounds and 2 ounces.

LOCAL TAXES PROVIDE BULK OF LOCAL ROAD FINANCES

Local Tax Revenues used for Local Roads, 1954

Fate Of Ordinances May Be Decided Wednesday Night

Five Measures Filling City Posts Got Mayor's Veto

What the next steps will be if any, with regard to the overriding of the veto by Mayor Olsen of five ordinances covering appointments to city offices, may be indicated at the meeting of the Council to take place Wednesday night.

The posts covered by the ordinances however, are not the only ones that are held up, and closely tied up with them are appointments submitted to the Council for approval by Olsen, that have been blocked by the Council.

The ordinances, when they came up for second and final reading, drew the disapproval of the Mayor, when it was indicated that the salaries they provided for, were not those the Council intended to set eventually, and the plan was to pass the ordinances, then raise the salaries. Olsen called this poor business and contended that if the Council planned to raise the salaries, then it should have made such provisions in the budget.

Since the Mayor's veto, there has been no public effort on the part of the Democratic controlled Council, toward making them law.

The posts covered by the ordinances are, Municipal Magistrate, for which John E. Mullan is named, Utility Clerk, for which Mary Bratus, has been named, Tax Collector for which Frank Gordon has been named, Clerk of Magistrate's Court, for which Edward O'Leary has been named, and City Physician, naming Dr. C. W. Hoffman. Mullan, Gordon, Dr. Hoffman and Mrs. Bratus, at present hold the offices to which the ordinances rename them.

The appointments made by Olsen, which the Council has failed to approve are of George Cosnowski and Aaron Foley to be members of the Board of Public Works and Frank Morgan to a member of the Recreation Commission to replace James Gray.

Scholarship Roll For February At Local Public School

The February scholarship honor roll for the public school here, was made public this week. The following names are included.

Grade 3—Sharon Boudnot, Louis Burkard, Jeanette Comstock, Christine De Angelo, Carol Grimes, Martha Hanafi, Fred Hansen, Elizabeth Kennedy, Cynthia Kurtz, Louise Litvinenko, Fay Perfinio, Peggy Sorenson, Nancy Wortley.

Grade 4—John Alden, Harmon Bloodgood, William Brennan, Nancy Lee Brown, George Carmichael, Dolores Gilson, Gloria Kolb, Virginia Louk, Donald Macalik, Robert Poetach, Margaret Reese, Arlene Reiner, Joan Roasman, Patricia Smith, Nancy Ann Sullivan, Jerry Tucker, James Tustin, Paul Weiss, Raymond Kondratyk.

Grade 6—Carol Ann Adams, Carolee Bolger, Sheila Burnbauer, Roger Dowling, Robert Hamilton, Daniel Harvey, Caroline Keller, Robert Moore, Victoria Pellos, Jerry Peterson, James Reick, Dolores Roberts, Gary Selover, Cheryl Spelcher, Edward Spratford, Harry Wernott, Kathy Yanotka.

Ann Brennan, Charles Drinamen, Joan Brown, Virginia Carmichael, Sandra Hansell, Carol Ann Hartman, Calvin Hartman, Kathleen Kries, Lois Kurtz, John Maher, Carol Rehtuss, Dennis White.

Douglas Cortleyou, Kenneth Fenner, John Keller, Robert Klein, Richard Petersen, Harry Whitworth, Dorothy Wetkowiak.

Korean Election

The head of a Korean village is elected by secret ballot, with one member of each household casting one vote. He holds office until he thinks it wise to retire, or until his constituents object sufficiently to his administration.

State Flowers

Vermont was the first state to pass legislation naming an official state flower—the red clover, chosen on November 9, 1894—although the territorial legislature of Oklahoma selected the mistletoe as its territorial flower in 1883.

SAFETY BUREAU OF STATE REPORTS 21 MORE LIVES SAVED

TRENTON — Receiving from the Bureau of Traffic Safety a report of 102 traffic deaths in New Jersey since the first of the year, Attorney General Grover C. Richman, Jr. said today that this represented a saving of 21 lives over the same period of last year.

Mr. Richman said the favorable trend of last week, with 8 fatalities as against 12 in the 1953 period, was commendable but urged greater individual participation in the current "Save a Life Today" program. This campaign, sponsored by the State Coordinating Council on Traffic and Safety, of which Mr. Richman is chairman, has a goal of saving 100 lives by June 30 compared with the 1953 period.

TUESDAY MEETING OF ST. HILDA'S GUILD

(Continued from Page 1) Dinner will be prepared and served by the members of St. Martha's Guild, with Mrs. George Berney Sr. as the chairman.

On Sunday, March 21st, from 8 A. M. to 12:30 P. M., there will be a cooked food and cake sale sponsored by the members of the choir when Mrs. J. Bodeman, Choirmother, will be in charge.

Platinum Alloy Shapes Tire Cording

During World War II the demand of the armed forces for better tires for both ground vehicles and airplanes was so well met by rayon tire cording that this material is now wholly used in peace-time tires. The strong, multi-filament yarn for the fabric is produced by extruding a viscose solution through a thin, shaped spinnerets having many tiny holes, each about three-thousandths of an inch in diameter. These spinnerets are made of a rhodium-platinum alloy to withstand the severe corrosive conditions encountered in the process.

Funeral Rites On Saturday For Stanley Klimkiewicz

After a long illness, Stanley M. Klimkiewicz, of 551 Washington Avenue, died Tuesday at his home.

He was a member of the Holy Name Society and Sacred Heart Society, of Sacred Heart R. Church here.

He is survived by his wife Josephine, four daughters, M. Frances Wojciechowski, M. Stella Klimkiewicz and Alice and Ann Klimkiewicz, all of this city; for sons, the Rev. Francis Klimkiewicz, pastor of St. Stephen's parish of Perth Amboy, John, of Long Island and Aloysius and Joseph of this city, also for grandchildren.

A funeral will be held Saturday morning from the residence at 9:30, with a requiem mass at Sacred Heart R. Church at 10 o'clock. Interment will be in Sacred Heart Cemetery.

Tomorrow night at 8:15, the Holy Name Society will recite the Rosary.

Stainless Steels

An appreciable proportion of the 1953 production of chromium-nickel stainless steels was required for the defense programs. As nickel becomes available in larger quantities for civilian uses, there are indications that manufacturers of products for the architectural, appliance and utensil fields will return to the nickel-containing types of stainless steels because of the good fabricating characteristics and other outstanding properties.

New Minesweepers

The United States Navy recently christened two new ships—both of them wooden minesweepers. Because of the wood and the use of other non-magnetic materials, such as certain nickel alloys and copper, these vessels will not attract magnetic mines.

KNOW YOUR GOVERNMENT

IGHUGS

This is not a word the Indians had for it, nor the Eskimo Equivalent of "I'll buy that refrigerator." Ighugs consists of the initials of an organization of Americans, meaning "I'm Gonna Howl'bout Unnecessary Government Spending."

And, with the March 15 income tax deadline just around the corner, the time seems appropriate for citizens and organizations across the nation to join in the howl—because about 23 cents out of every dollar earned by the average worker was paid out for hidden and

direct taxes last year. For the family with an income of \$3,000, this meant direct and hidden tax payments of \$960 and, for the \$4,000 family, about \$1,280.

The "IGHUGS" include representatives of Farmers', doctors', women's, business and other groups across the country. They recognize the place of necessary taxation, but urge as objectives:

(1) Cut out all wasteful government spending, thereby greatly lightening the tax load, and.

(2) Encourage Americans everywhere to join in the fight. The fight for these two goals is not new here in New Jersey where the New Jersey Taxpayers Association and other citizens' organizations have been actively

waging the citizens' battle for years. Renewal of the national emphasis upon the objectives is particularly noteworthy at income tax time, points out the Association.

Canada Chief Nickel Producer

It is estimated that Canada's output of nickel in 1953 reached 285,000,000 pounds, or about 85 per cent of the free world's total production.

Search For New Nickel Deposits Continues

During 1953 the nickel industry continued its extensive search for new nickel deposits. In Canada, particularly, this program has been on a scale far surpassing anything previously undertaken.

NEW GRADUATE PHYSICS PROGRAM SET AT RUTGERS

NEW BRUNSWICK—With industry becoming increasingly interested in the applications of physics in atomic energy, electronics, and spectroscopy, Rutgers University will introduce this fall in New Brunswick its first evening graduate program leading to a master's degree in physics for physicists, engineers, and other scientists employed during the daytime.

Under the plan announced today, the Rutgers Graduate School and Physics Department will provide the academic program, which will follow that offered during the day at the State University, while the even-

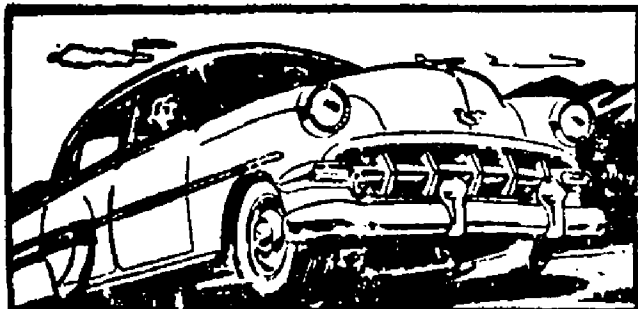

ing college will administer the classes.

Members of the Physics Department will serve as instructors in the new program, including Professors A. Lloyd Greenlee, Ernest A. Lynton, Bernard Serber, Henry C. Torrey, Richard Meldner, and Charles A. Whitemer.

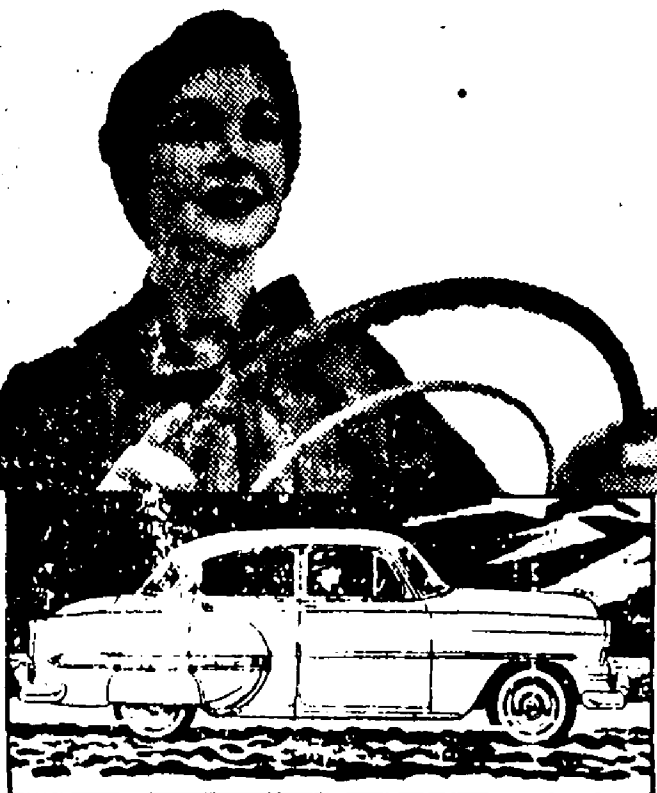

Largest Nickel Consumer

The steel industries of the United States, the United Kingdom and Canada, in the production of stainless steel, engineering alloy steels and jet engine alloys, in 1953, were again the largest consumers of nickel.

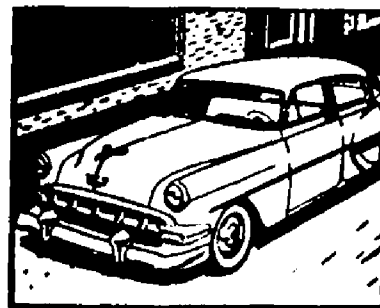

CITIZEN ADS BRING RESULTS

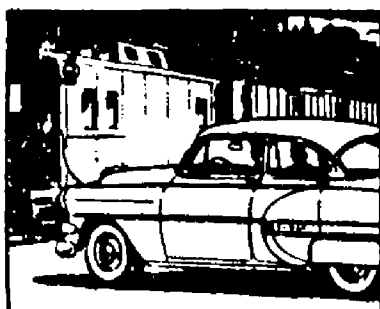

OUT AHEAD WITH THE HIGHEST-COMPRESSION OVERHEAD VALVE ENGINES. Chevrolet's great valve-in-head engines have the highest compression ratio of any leading low-priced car—7.5 to 1.

OUT AHEAD WITH THAT SMOOTH AND SOLID BIG-CAR RIDE. Chevrolet's the only low-priced car with Unitized Knee-Action—one reason for the superiority of Chevrolet's road-smoothing, road-hugging ride.

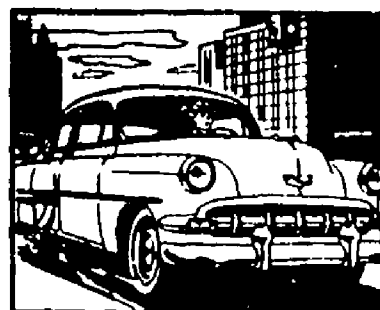

OUT AHEAD WITH THAT BIGGER, LOWER LOOK. Chevrolet is the only low-priced car to give you Body by Fisher with that big, smooth, low-slung look.

THOROUGHLY-DESERVED TRIBUTE

Secretary of Agriculture Benson recently paid an unusual and thoroughly-deserved tribute to the railroads. He dealt with last summer's drought, which was the worst in 20 years in many cattle-producing regions. Months passed without rain, crops dried up, and range grass turned to dust. The emergency became acute.

The government helped with loans and a program of furnishing feed grains and hay to farmers and ranchers in the stricken sections. And then the drought victims got an important assist from the railroads. On July 1, western railroads voluntarily cut their rates for moving emergency feed in half. Later, railroads throughout the nation extended the half-rate charges to disaster shipments of hay. Thousand of carloads of these emergency shipments moved into the drought centers.

According to Secretary Benson, the reduction in freight charges on the livestock feed shipments amounted to some \$5,779,700, and on the hay shipments to about \$6,750,000. He then said, "We feel that the railroads are to be commended for their farsightedness in cooperating in this program."

Railroad welfare is inextricably bound up with the general welfare—and the railroad people know that and act accordingly. The drought emergency was an outstanding example.

IGHUGS

Between March 1 and 15th, a period when Americans are unusually conscious of the tax burden, we are going to hear a lot about "Crusade IGHUGS". This new word isn't of Eskimo origin as it sounds, but means "I'm Gonna Howl 'bout Unnecessary Government Spending". The crusade is purely non-partisan and is designed to create a vivid awareness of the fact that taxes now take the staggering total of 32 cents out of each dollar we earn.

IGHUGS is the first major project of a new organization known as the Farm-City Conference Board. The Board has an impressive and representative membership—it is made up of farm groups, industrial concerns, and various kinds of associations, including the National Grange, the General Federation of Women's Clubs, the American Medical Association, Kiwanis International, etc.

The women's clubs federation, which has 15,000 affiliates, will carry the ball in the big job of stimulating group action at the community level. An activity such as this has to get down to the grass roots, and create enthusiasm there, if it is to be successful, and that is the aim.

When you make out your tax return, remember that much of the cost is the result of past waste and extravagance in government, and public demand for too many tax financed hand-outs. So take a worthwhile pledge by saying a single word: IGHUGS!

THE OLD-AGE PENSION PROBLEM

There is much discussion, in and out of the government, on the subject of old-age pensions. And Congress has before it various bills to change in one way or another the existing pension situation.

One proposal would bring additional self-employed professional people and others under the provisions of the Social Security Act and subject them to the Old Age and Survivors Insurance Tax. This, of course, would be done by force of law—individuals would have no choice and would have to pay whether they wished to or not.

What would seem to be a better step is found in what are known as the Jenkins (Reed)-Keogh Bills, which are now before Congress. They would not amend the Social Security Act, nor would they prevent the extension or broadening of the existing system. They would simply amend the internal revenue law to permit self-employed and pensionless people to set aside, tax-free, a limited portion of their earned incomes into individual retirement funds. The money could be withdrawn only when the in-

dividual reached 65, became permanently and totally disabled, or died. Withdrawals would be taxable. Payments to the fund would be limited to a maximum of 10 per cent (but not more than \$7,500) of the annual income.

All manner of national organizations, made up of engineers, doctors, actors, authors, traveling men, and others have testified before Congress in favor of these bills. Here is one solution to the pension problem of those who prefer to take care of their own old-age needs, instead of depending on a compulsory government system.

MONUMENT TO INDEPENDENCE

One of the leading cattlemen's organizations is planning to construct a new headquarters building. The organization in question has followed a consistent policy of unequivocal opposition to government price supports for cattle. This caused the Record Stockman of Denver to editorially observe that the new building should be regarded "as a monument to a small segment of the nation that has asked to stand without a direct prop".

Not all cattle producers, of course, have had the fortitude to oppose supports. But it is to the everlasting credit of the cattle industry that the principal producers' associations, with the largest memberships, have done so. There are various reasons why they have taken this attitude, even at times when cattle prices dropped abruptly and in many cases producers had to take heavy losses.

One is the traditional independent spirit of the cattleman. His has always been a business which is full of risks and imponderables. If things go right, he can make money fast—and if things go wrong he can lose it as fast or faster. He wants to take his own chances and stand on his own feet.

Another is that if the government should support cattle prices, using the taxpayers' money to do the job, it would only be a matter of time until government bossed the cattle business through and through. When government controls the purse-strings, it is going to call the tune.

THE FIGHT CONTINUES

Some optimists seem to believe that the overall policies of the present national administration mean that the trend toward socialization of enterprise, which has been most marked and most costly to the taxpayers in the field of electric power development, has not only been checked, but has been reversed.

That is a highly dangerous assumption. A far wiser view was recently expressed by the president of the National Reclamation Association when he said: "We are not through with the public power issue. It will continue in political debates in coming political campaigns. The hostility engendered against privately owned electric utilities, which had its origin in the sins of some of the operators in the 1920's, has served as a fine campaign issue for more than a quarter of a century. Out of these emotion-packed tirades has developed a theory that the federal government has a primary responsibility to provide electric service to the American people. This theory is neither true in fact nor possible of accomplishment."

Those who believe in socialism are well organized. They haven't given up. They are simply awaiting their chance. Here's one more case where eternal vigilance is the price of liberty, and we should never forget it.

LEGIONS OF NEW INVESTORS

A short time ago a new plan for buying stocks listed on the New York Stock Exchange on an installment basis—with payments ranging from \$40 a quarter to \$1,000 a month—went into effect. According to a Newsweek report, the experience during the first six days was "so successful that the method promised to become an important part of regular trading on the Big Board"—4,054 shares valued at \$135,180 had been purchased. And Time reported another significant fact—"most of the orders came from people who had never invested in stocks before."

The pay-as-you-go idea is designed to attract the smaller investor, and to make it as convenient as possible for him to put part of his savings in the stocks of corporations in whose management and future prospects he has faith. And it should no longer surprise anyone that the financial world is interested in small investors. The day when the bloated plutocrat of the cartoons was the dominant figure in financing American industry passed long ago. Now most investors are people of moderate means. In 1953, small purchases (less than 100 shares) on the exchange amounted to nearly \$1,666,000,000.

The ownership base on which corporate industry rests is getting broader all the time. This is true "public ownership"—and the opposite of socialism.

Hurdle Racing
Program Set For
Monmouth ParkNational Maiden Hurdle
To Be Run On July 16th

OCEANPORT—During Monmouth Park's forthcoming June 12-August 9 racing season hurdle racing will be featured. The Midsummer Hurdle Handicap, richest event of the Monmouth season, and the Monmouth National Maiden Hurdle, a runningmate to similar races contested at Belmont Park and Saratoga, will be run on Friday July 16th according to an announcement made by General Manager Edward J. Brennan.

Hurdle racing, since its revival at the beautiful seashore track in 1951, has gained steadily in popularity with Monmouth Park race-goers and horsemen alike. The Hurdle programs conducted during the 1952 and 1953 meetings drew so well in the matter of entries that each of these years additional races for the jumpers were added to accommodate the increasing number of horses available for these events.

The 1954 program will hold its inaugural contest on Tuesday, July 18. Jumping races will be presented thereafter three times weekly, on Tuesdays, Thursdays and Fridays, closing with the Midsummer Hurdle Handicap on Friday, July 30th. The program has been arranged so that it will not conflict with other hurdle schedules conducted at Eastern tracks. The best cross country performers will be available and thrilling hurdle contests will result.

River Jordan, a four-year-old colt by Bimelech owned by James F. McHugh of Pennsylvania and trained by Morris H. Dixon, Jr., took top honors in the National Hurdle Maiden series by winning both the Monmouth Park and Saratoga series events last year. King Commander, owned by L. R. Trolano and trained by M. G. "Mickey" Walsh, was the winner of the rich Midsummer Hurdle Handicap contested over the Monmouth Jumping Course.

First Liquid Chemical Carrier

The first ship ever built specifically to carry liquid chemicals was recently launched. Having a total capacity of approximately 5,000,000 gallons, the new vessel will transport eleven different chemicals. Four of the ship's tanks have been expressly designed to carry 73 per cent caustic soda. To maintain high product purity in handling, transporting and storage of this material, either pure nickel or nickel-clad steel is being employed for every piece of equipment coming in contact with it. In all, over 685,000 pounds of nickel-clad steel and 47,000 pounds of pure nickel were used in the construction of these tanks.

TOPICS

(Continued from Page 1
that are avoidable."

On the heels of the bloody
nightmare in the US Capitol
when a handful of Puerto Rican
fanatics—branded as Commun-
ist dupes—opened fire from the
gallery on the House of Repre-
sentatives in session, official
Washington reverted to a regime
of war-time security, and some
changes were in the making.

The Capitol police, a relic of
the political "spoils system," and
made up largely of boys working
their way through school and
"deserving" oldsters, is now
likely to be reorganized into a
force of professional policemen.

The three Puerto Ricans,
seized as they tried to escape
from the balcony, and a fourth
picked up later in a Washington
bus terminal, were speedily in-
dicted on forty criminal counts
by a Federal grand jury. Con-
viction could mean terms of
from 75 to 125 years. And if
those who were shot down, should
die "within a year and a day," of
this idiotic attack, the Govern-
ment will ask new indictments
for first-degree murder.

Meanwhile, Attorney General
Brownell, Jr., was reported
studying further steps by the
Department of Justice to bring
the Puerto Rican Nationalist
conspiracy in this country un-
der control. In other words, we
presume he was reading the re-
ports and warnings on the sub-
ject, with which the FBI fur-
nished him months ago.

Additional protection has been
thrown about President Eisen-
hower, Secretary of State, John
Foster Dulles at Caracas, Vene-
zuela and Henry Cabot Lodge,
Jr., US Ambassador to the UN,
and FBI Director, J. Edgar
Hoover, all of whom are said to
have been threatened by this
terrorist group.

A special House security com-
mittee, which recommended real
cops for the Capitol, is also ur-
ging a seven-foot shield of bullet-
proof glass be built around the
visitors' gallery.

There is, no doubt, some merit
to all of the many protective
devices that have been insti-
tuted, planned or discussed. But
if there is any moral to this
bloody sequel to the attempt on
President Truman's life in No-
vember 1950, it would seem to
be that our drive on subversives
should be all-out coordinated
effort, by all the forces of Gov-
ernment under one leadership,
and not left to a handful of
patriots in the House and Sen-
ate.

The first of March 1964, will
be long remembered, perhaps as
long as the Ides of March 44
B. C. For when those five re-
presentatives of the sovereign
American people and of the all-
time ideal of free government,
fell under those blazing guns.
"Then," as Mark Anthony said
of Julius Caesar, "I and you
and all of us fell down, whilst
bloody treason flourished over
us."

Lesson for Wives

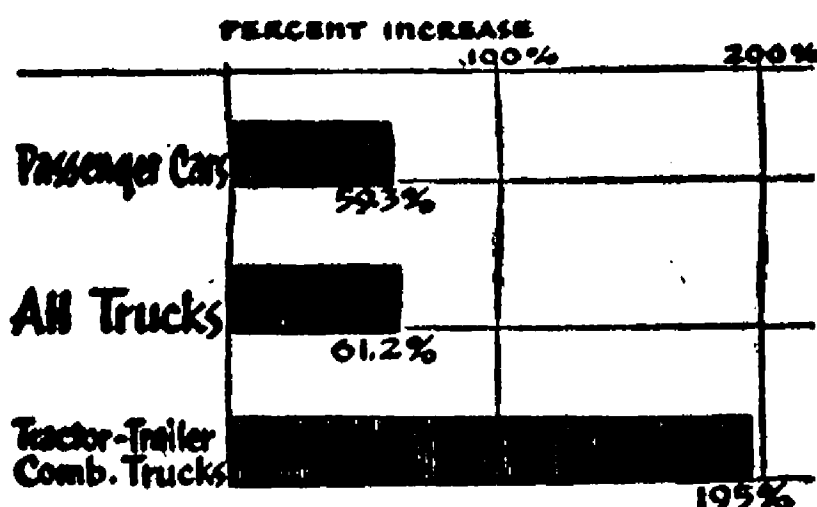

Long ago Euripides said, "A
man's best possession is a sym-
pathetic wife." This still is true.
With a wife who believes in him, a
man can reach great heights. His
friends will think he is witty, wise,
and kind because she tells them so.
He will be a successful person even
though he piles up no store of
worldly goods. A woman gains by
being freely of her faith to her
husband. Her fate is so closely
tied with his that when he succeeds,
she benefits too.

RED AND HIS GIRL

Pert Betty Ann Grove and Red Buttons are the frolicking twosome
on the "Red Buttons Show," CBS-TV's weekly comedy treat. Red's
amorous pursuits of teen-age "Betsey" get him into plenty of hilarious
predicaments, and often as not, Wilfred (the 'other man') is the
cause of all his love trouble. But Betty Ann and Red agree that merry
mix-ups can be a lot of fun, even with Wilfred in the picture.

1954 Training For Industrial Leaders

NEW BRUNSWICK Another industrial revolution, this time involving personnel not machines, is gaining momentum in America.

Where once a formidable chin, bulging biceps and a rumbling voice qualified a man to be shop or plant boss, now the emphasis is placed on a man's potential to manage people and not merely to give orders. Tact, diplomacy and even psychology in human relations is increasingly important for the 1954 boss.

According to Thomas Q. Gilson, chairman of the management program in the Rutgers Institute of Management and Labor Relations, this "revolution" does not stop at the shop boss level. Supervisors and even executives are affected by it, says Professor Gilson, who has devoted some 10 years' research into the qualities and conditions that make good executives.

The key to the changeover is the development of new training techniques known as role-playing, forced leadership and voluntary discussion. They apply up the line from foreman to top executive, Mr. Gilson explained.

Formerly, he says, new supervisors or executives were recommended by their superiors and coached by their predecessors. The success of this method was left to chance, with the untrained abilities of the "teacher" having a most important and equally uncertain bearing on the outcome.

The training methods installed by today's progressive industries are more efficient and democratic, and surely more conducive of success, in their selection of new executives, claims Professor Gilson.

"Take role-playing for instance," he said. "Just as its name implies, role-playing is the acting out by the trainees the roles of others in a problem situation. The acting is spontaneous and gives the observers a picture of good and bad attitudes and reactions under varying conditions. It also provides the actor with actual experience and a grasp of the feelings of those who regularly occupy such positions."

Forced leadership, according to

the Rutgers management expert, involves splitting a group into small sub-groups, each assigned a problem to solve and report back to the entire group. In the process a spokesman or "leader" emerges. The process is repeated with the leader from the first group now in one group and the others reassigned until most of the participants have had an opportunity to serve as a leader. This procedure is useful both in the selection and training of managers of people because it stresses the importance of persuasion rather than authority.

In the training of supervisors, Professor Gilson points out, the case study technique is receiving increased attention.

"Industry," he says, "has much know-how on good supervision principles. Its problem is in applying this knowledge."

Case studies establish the connection between theory and practice. Here, as in role-playing, the trainees are not personally involved in the results of the problem situation and they react objectively to the situation.

There is more involved in case studies than merely discussion of interesting situations. Each case study must be planned so that it illustrates the application of a principle, if the group is to be able to translate the experience into one which members are likely to face. The training group works together in gathering facts, analyzing the problem, and reaching a solution. This method, Gilson says, helps uncover facts usually overlooked, illustrates feelings and emotions of those involved in the cases, and, most important, shows each foreman and supervisor that there may be many answers to a given problem.

Whichever of these new training methods an industry elects to use, Professor Gilson is convinced their application will produce better "bosses"—men who are leaders first and bosses second.

"There is no reason," he hastened to add, "to suspect that muscles are out of the picture." But the 1954 boss will flex them in the garden at home, not in the plant.

Marine Applicants Of Ductile Iron

Ductile Iron castings find applications in the marine industry because they combine the corrosion-resistance of cast iron with strength approaching that of steel. They are used for general valves and piping, dock-side and deck gear, winch and hoist components, shackles and many other parts.

Projected Free World Nickel Production Capacity

Based upon announced expansion programs, the production capacity of the nickel industry of the free world by 1960 should be at least 75 per cent greater than that existing in 1949, the year prior to the start of the Korean conflict, when production of nickel totalled about 268,000,000 pounds.

Job Information Will Be Sought In Popular Survey

Will Be Conducted During Week Of March 11

Special questions on part-time work and inquiries regarding persons with a job but not at work will be asked in the March Current Population Survey, according to John B. Lovett, Supervisor of the New York District Office of the U. S. Census Bureau.

The purpose of the part-time work question is to distinguish persons who are working part-time by choice and those who work hours have been cut back because of slack work or other economic factors. The questions on persons with a job but not at work are designed to find out how long these persons have been or expect to be absent from their jobs.

The Current Population Survey, which will be conducted during the week of March 14, will include special questions to be asked in addition to the regular questions on employment and unemployment which are asked each month. Information collected locally is combined with that gathered in 229 other sections of the country and combined into national figures on employment.

Mr. Lovett stated that the Census Bureau reported on March 6, that the nation's population increased to 161,100,000, which is 9,968,000 more than shown in the 1950 count. A continued high level of births in relation to deaths was a factor responsible for this increase. In addition, immigration contributed about 11 per cent to the net gain although it dropped in 1952 and 1953.

Births reached almost 4,000,000 in 1953, which set a record. At the same time, the mortality rate continued at the 1952 low level of 9.8 deaths per 1,000 population, in spite of a rise in deaths from respiratory diseases and an unusually hot summer.

"Air-Borne" Concrete

A system of blowing concrete by compressed air through pipes from underground mixing stations into construction forms has been installed at International Nickel's Creighton Mine in Ontario. Traveling along levels, up or down manways, and through twists and turns of the mine's workings, the "airborne" concrete often is carried more than a quarter of a mile by means of this novel installation.

1953 Nickel Production Up
Production of nickel by the free world is believed to have approximated 340,000,000 pounds in 1953, an increase of about 20,000,000 pounds over 1952 and 50,000,000 pounds over 1951.

Durable Monel Roof

When New York's Pennsylvania Station was built, Monel, a nickel-copper alloy, was used for the entire roof over the main waiting room and arcade except for the skylight frames. These frames gradually disintegrated from atmospheric corrosion. But the Monel roofing shows no sign of corrosion, pitting, or embrittlement after more than 43 years of exposure to the same conditions.

CITIZEN ADS BRING RESULTS

POLIO CORPS PLANS ARE BEING WORKED OUT

Details for the setting up of a Polio Emergency Volunteer Corps to serve in the event of an outbreak of polio in Middlesex County are being worked out by the Middlesex County Chapter of the National Foundation for Infantile Paralysis.

Volunteers will be given instruction in general bedside care, hygiene, preparation and application of hot packs, and handling of polio patients. Classes will be held at Perth Amboy General Hospital, and volunteers accepted for the corps will receive a 20-hour course of training, divided into ten periods of 2 hours each, twice a week.

Anyone wishing to enroll in this PEV Corps may do so by contacting Mrs. Olga Becker at Chapter Headquarters, 277 Bertrand Avenue, Perth Amboy. Phone number is Valley 6-7474.

As soon as a sufficient number of volunteers have been enrolled a definite date for starting this PEV Course will be announced.

SATURDAY NIGHT FIRE ROUTED TWO FAMILIES FROM HOMES

An early Saturday night fire, routed two families from their homes at 149 David Street. The building was considerably gutted by the flames and firemen placed the damage in the neighborhood of several thousand dollars.

The blaze is reported to have started on the back porch of the house. The second floor was occupied by Mr and Mrs John Maliszewski, and the first floor by Mr and Mrs Louis Tarantello.

Several firemen, slightly overcome by smoke, were treated at the blaze.

Lighter, More Durable Propellers

The higher strength and lower specific gravity of the relatively new nickel-aluminum bronze alloy is permitting the design of ship propellers which are some 20 per cent lighter than the same size cast in conventional propeller bronze. This material also cuts maintenance costs because of its high resistance to erosion, cavitation and corrosion in sea water.

Miss Jean B. Septor Wed Saturday To Joseph John Kopas

Saturday night at Christ Church, Miss Jean Beryl Septor, daughter of Mr and Mrs Raymond Septor, of 315 Fourth Street, became the bride of Joseph John Kopas, of 420 Watson Avenue, Perth Amboy.

The Reverend Christopher Nichols, the rector, officiated at the candlelight ceremony, at 7 o'clock.

The bride, given in marriage by her father, wore a ballerina length gown of Chantilly lace over satin with a matching lace cap and short veil. She carried a Colonial bouquet of roses and assorted white flowers.

Miss Constance Septor, sister of the bride, was the maid of honor and Paul Joback of Hopelawn, was the best man.

Upon their return from the Florida wedding trip, they will make their home at 72 Avenel Street, Avenel.

The bride graduated from Hoffman High School and is employed by the Standard Oil Company of New Jersey, at Morristown. Mr Kopas is a graduate of Perth Amboy High School and a veteran of World War II, and the Korean War. He is employed by the Witco Chemical Company at Perth Amboy.

WOMAN'S CLUB GROUP MAKES PLANS FOR CARD PARTY

Under sponsorship of the Decorating and Garden Department of the South Amboy Woman's Club, a card party will be held at the home of Mrs. Donald Beam, 348 Main Street, Thursday evening, March 11th at 8 P. M.

Mrs. Beam and Mrs. Georg Hasselacher, are the cochairmen of the committee.

Number of Businesses

The number of businesses in the United States is now set at 2,870,000—470,000 above the pre-war high and 1,000,000 above the wartime low. A 300,000 gain in 1947 shoved it up to its present mark, according to the U.S. office of business economies.

The SNAPSHOT GUILD

Have your best and most important pictures enlarged so that they will assume proper importance when placed in your album, and at the same time add interest to the appearance of the book.

Variety Will Add Spice to Your Album

VARIETY, so 'tis said, is the spice of life—and it is also the dash of spice that will add interest to your snapshot album. And we aren't talking about variety in the subject matter of your pictures. We are talking about varying the way you place them in your album so that, at first glance, every page won't look just like the one before.

Pick up an album that is filled with pictures mounted in neat rows on page after page. Every picture seems to have the same importance. But we're sure that isn't true. Some of our snapshots are bound to be more important to us than others.

After thinking how such album pages look, think for a minute of the way magazines put together their picture pages. If they did them in the same way most of us do our albums, we'd tire of them very quickly. They have to lay out their picture pages in a fashion appealing to the eye. They strive to have not just each picture, but the page as a whole be interesting in appearance.

A brief study of some of these pages will give you ideas you can adapt for your own album. Note how the pictures are arranged on the page. Note how the important

photos are enlarged and given lots of space.

Enlargements of your favorite and most important pictures are easily within the average picture-taking budget. Your photofinisher will do a nice job of enlarging your best negatives and you'll be surprised at how little it costs.

One of the tricks you can borrow from the magazine layout people is that of overlapping pictures, having one run into the other. You can easily do things like that in your own snapshot album—you don't even have to cut the prints. Just slip the corner of one under the corner of another.

You can trim your snapshots into odd shapes. You won't want to do too many of them that way, but just enough to add a dash of interest to the book. You can even feature the "star" of your family, or of a special occasion in a star-shaped picture.

When you are making up your album, remember that, as in looking at magazines, you always see two pages at one time. Keep that in mind and lay the two facing pages out at the same time so that you can be sure they'll look well together. —John Van Guilder

HEART FUND DRIVE LEADERS TO HOLD MEETING TONIGHT

A meeting of all community chairmen and captains of the 1954 Heart Fund Drive in Middlesex County will be held tonight at 9 o'clock.

Final reports from each chairman will be heard. The meeting will be held in Sally's Restaurant, Raritan and Third Avenues, Highland Park. In addition to the reports, citations and awards to local persons who assisted it in conducting the fund drive will be made by the Middlesex County Heart Association.

Howard Dayton, executive director of the New Jersey Heart Association, will describe how Middlesex County's progress compares with other counties in the state, and will review the recent fund drive throughout the state.

"Suffered 7 years then I found Pazo brings amazing relief!"

says Mr. M. W., Los Angeles, Calif. Speed amazing relief from miseries of simple piles, with soothing Pazo! Acts to relieve pain, itching instantly—soothes inflamed tissues—lubricates dry, hardened parts—helps prevent cracking, soreness—reduce swelling. You get real comforting help. Don't suffer needless torture from simple piles. Get Pazo for fast, wonderful relief. Ask your doctor about it. Suppository form—also tubes with perforated pile pipe for easy application.

Announcer Carl Warren is fast becoming the most nicknamed member of Mutual's New York staff. He's known as "Cactus Carl" for the "Bobby Benson" programs. But he's introduced on the week-day "Johnny Olsen Show" as Carl "Honey Lips" Warren.

Here's a warning to all men from Reggie Cross, the comedian for

Mutual's "Man On The Farm" hi-jinx variety show. "Girls are funny about what they wear," says Mr. Cross. "A gal can wear a swimming suit and have no intention of going near the water. She can wear a tennis skirt and have no intention of playing tennis. She can wear a football sweater and have no intention of playing football. But when she puts on a wedding gown, watch out. She really means business!"
